**RST620**

- ▶ **Handsfree / Privacy Mode**
- ▶ **Voice/Data/Internet/FAX/SMS**
- ▶ **Communication System Inegration**

The Beam TranSAT Fixed Satellite Telephone provides a complete hands-free voice and telephone for a wide range of mobile and fixed site applications where easy access to reliable voice and data communications is required.

The terminal provides a compact fully functioned user handset and supports both hands-free and privacy modes of operation, automatically switching between either mode with the handset in or out of the cradle.

The system can also be used as a permanent non hands-free solution simply by not connecting the microphone. The loud ring indication through the speaker system makes it an ideal installation in a noisy environment.

The RST620 is equipped with an RS232 serial data port to access Iridium data services
